

# Center Pivot Planter

## 8-Row Drawn SeedPro Precision Vacuum Planter Kit

installed on a center pivot toolbar with modified modular operator's platform and specially designed folding gauge wheel for transport.

ALMACO modified gauge wheel in transport-locked position.

Loaded with gauge wheel not in folded position.

8-Row Drawn SeedPro Precision Vacuum Planter Kit in pivot position. Featured with hydraulic PTO pump.

- Available for SeedPro or Cone Type Seed metering systems
- Modified modular operator's platform designed for 2-, 4-, 6- or 8-person operation. Used for yield trials or nursery plots
- Plants more plots per day
- Increases field productivity
- Optional seed dividers and automated indexing systems are available to automate process and reduce number of operators
- 12 and 16 row planters are also available
