

# Combine Options

## Hydraulic Dump Hopper

For on-board storage of seed samples – available in many sizes and configurations.

## Transgenic Combine Modifications

- For ease of clean-out, purity and visual inspection of the combine to ensure that all seed is free of the combine. Features include:
  - Raised engine platform
  - Rerouting and containment of hydraulic hoses
  - Quick-release sieves for easy removal
  - Removable shaker pan
  - Inspection panels for additional access
  - Additional guarding and flashing to prevent seed from bridging

## Custom Seed Devitalizers

Available for installation on all combine models.

## Folding Unload Auger for Transport

## On-board Air Compressor/Tank

For use in cleaning off the combine and purity clean-outs. Multiple air wand couplers located throughout the machine.

*Internal view of seed devitalizer*

## Grain Tank Sacking Chute

Allows for bagging large samples off of the grain tank.

## Adjustable Head Modifications for Narrow Row Spacing

Custom built row crop heads for various row spacings.

## Vacuum Sub

Sampling options for all models.

# Combine Options

## Operator Present Safety Circuit

Engine kill timers are enabled when operator leaves the seat for a certain amount of time.

## Other Options Include:

- Manual or vacuum sub-sampling from operator's seat
- Multiple sample bagging options and locations
- Cold weather engine starting aid
- Grease manifolds for ease of maintenance on all hard-to-reach bearings
- Extended unload augers for added height
- High speed unload auger
- Additional lighting for night operation
- Full-track system for wet or muddy field conditions

## Cab Features and Options

Numerous features to make your plot harvesting experience more comfortable

- Heat / Air conditioning
- Tilt steering
- Deluxe adjustable seat
- Foot controls
- Electric over hydrostatic drive
- Electric concave / winnowing fan adjustment
- Closed circuit video for safety and sample process monitoring
- AM/FM/CD/ weather band and satellite radio
- Ergonomically designed in cab sample processing
- Visual grain sample inspections
- Digital shaft monitoring
- Accessory plug outlets
- Custom features available
- Buddy seats

Closed Circuit Monitors for safety and operator confidence.
