

## Gentle, Efficient Ear Corn Shellers Designed For Superior Seed Quality And Exceptional Sample Purity.

■ Can serve as single ear or bulk sheller.

■ Equipped with underslung, adjustable grated-type concave.

■ Can be equipped with electric motor, gasoline or diesel engines ... some combinations available.

■ Self-cleaning design assures no carryover of seed.

■ Variable-speed threshing cylinder and quick-adjust concave.

■ Options allow use on multiple crops.

■ Seed catch pan is standard. Optional bulk shelling chute is also available (shown).

■ Cob-clearing assembly keeps crop moving.

■ Inspection panels allow quick and easy visual checks of interior.

■ Optional aspirator for indoor use (shown).

## Bulk Sheller, ECS

A versatile, self-cleaning unit well-suited for both high-purity or large-volume applications.

- Bulk or single ear shelling
- Bulk capacity of 2,200 lbs. per hour
- Enclosed metal raspbar cylinder
- Variable speed drive for cylinder with single lever adjustment
- Underslung, open-grated concave with clearance adjustment via single lever
- Inspection of entire threshing area through top panel
- Cob kicker assembly
- Removable seed collection tray
- Safety cover guards
